The Trust Edge for School Districts

A lack of trust is costly to school districts. Research shows that education is one of the most trusted institutions in the United States. As trust levels rise in schools and a trusting environment is built, school districts may likely see positive results in staff retention, student enrollment, and student achievement. Learners are guided through valuable content within the Trust Edge Framework as outlined in David Horsager’s national best-seller, “The Trust Edge.” By engaging and interacting with the content from this framework, participants will experience powerful personal and professional growth. They can expect to gain strategies to help deepen relationships and develop more committed teams.
